

Pre-Education - Patient empowerment through automated digital education of gynaecological patients on the course of treatment

PRINCIPAL INVESTIGATOR:
Dr. Jessica Olschewski
Charité

SUMMARY

Medu+ aims at enabling patients to access audited information to inform themselves about diagnosis, treatment and additional care programs through access to a digital platform before, during and after their clinical pathway.

Whether it's the initial consultation, a post-operative session, or something else, the clinical environment for many patients can represent an unknown and unsure place, where information sources are varied and sometimes inconsistent. Medu+ is helping to close the loop on patient information sources starting with the gynecological clinic at the Charité and moving outwards from there.

PROJECT ACHIEVMENTS DURING AND AFTER I4H

- Developed the digital platform Medu+ accessible for patients and gynecologist at Charité.
- Medu+ contains curated disease-relevant information and care plans and thus supports doctor-patient communication.
